

A detailed line drawing of a backpack sprayer. The main tank is a large, rounded container with a handle on the left side, labeled with the number 2. On top of the tank is a pump handle, labeled 1, which is a rectangular bar with vertical ridges. A hose, labeled 7, is connected to the pump handle and extends upwards. Inside the tank, there is a float valve assembly, labeled 5, which consists of a vertical rod and a float. A dipper, labeled 4, is attached to the end of the rod. A long, thin spray wand, labeled 3, is connected to the side of the tank. The wand has a trigger gun at the top, labeled 3, and a spray nozzle at the bottom, labeled 6. The nozzle is a small, cylindrical tip with a trigger. The entire device is shown in a side profile view.
